

Pippa Teaches Glitch to Fly,

Savage AI Studios

Light as a Feather

Bird bones are hollow inside, like tiny straws — super light!

Feathers Like Shingles

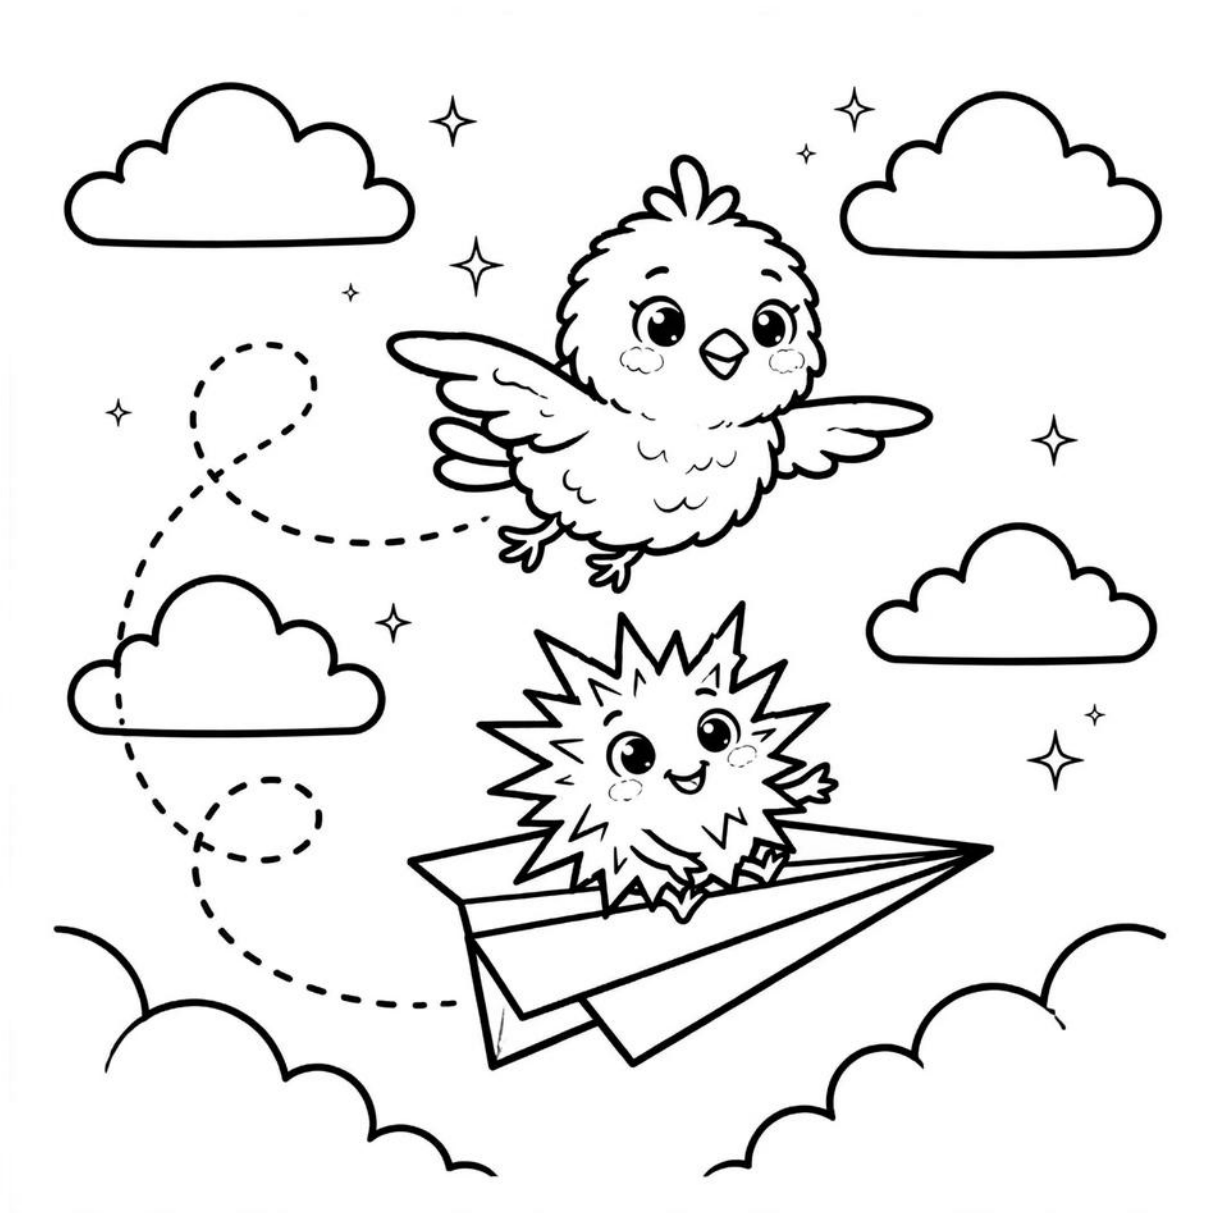

Wing feathers overlap like roof shingles to catch the air.

Flap Down Hard!

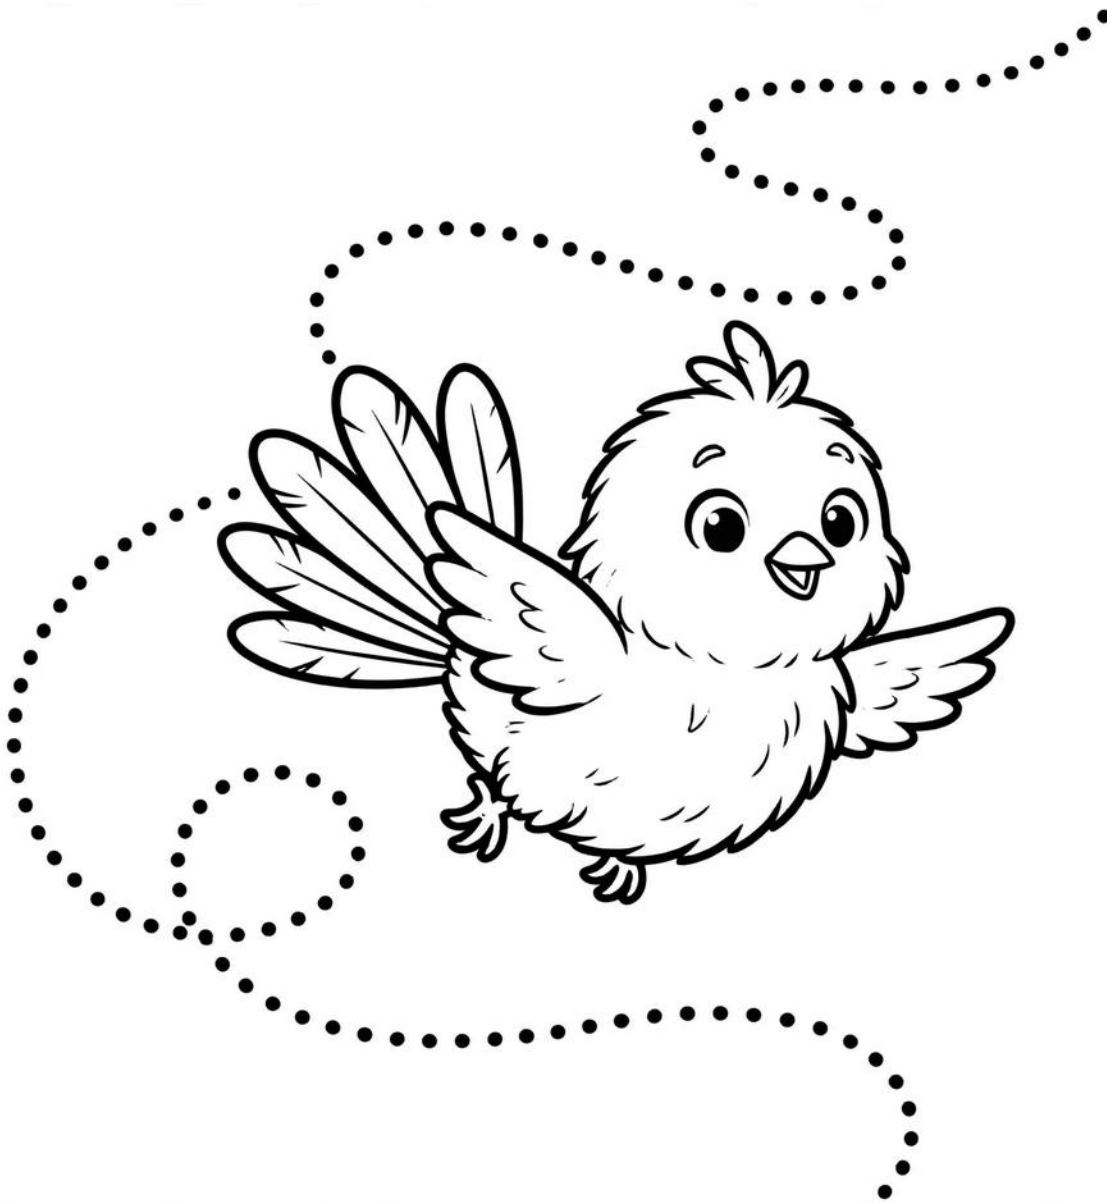

Flap those wings down hard, and the air pushes the bird right up!

Glide Like a Paper Plane

Then hold your wings flat and glide — no flapping needed at all.

The Tail Is a Rudder

The tail fans out like a rudder to steer left and right.

Three, Two, One... Lift Off!

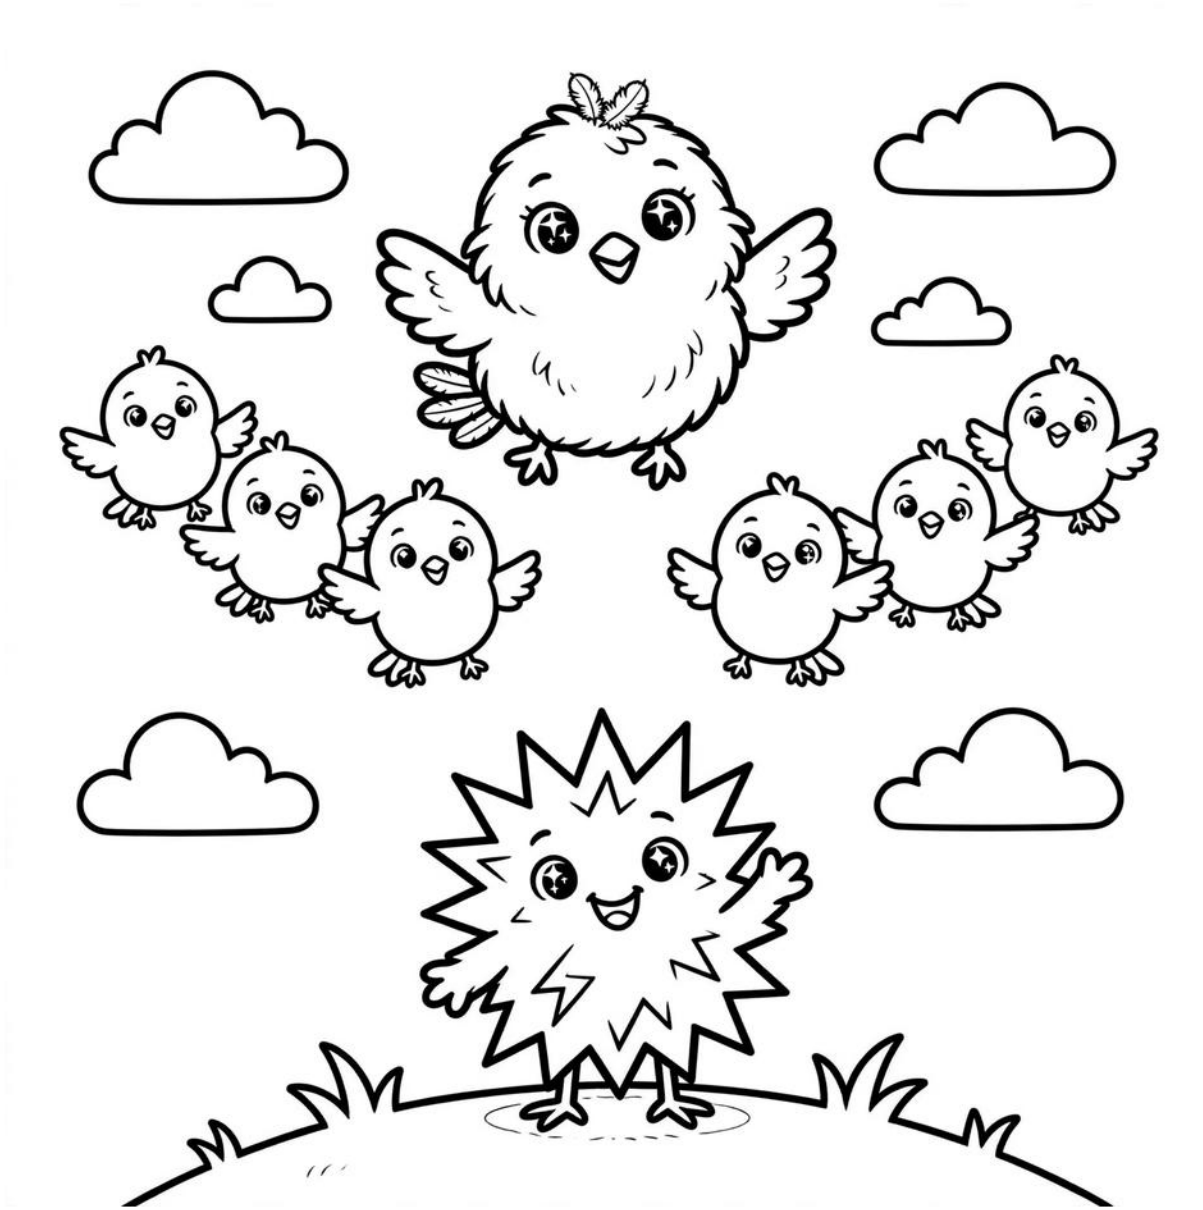

One big leg-push, then flap-flap-flap — up, up, and away!

Feet-First Landing

Feet down, wings brake the air — and that's a soft, perfect landing.

Flying with Friends

Birds fly together in flocks — it's safer and more fun with friends.

Glitch the Bouncer

Pippa taught Glitch everything about flying — but Glitch just bounces instead. Boing!
